---

## OBJECTIVE

---

To secure a position as a Software Engineer and pursue relevant experience to broaden my skill set and produce results.

---

## EDUCATION

---

### Georgia State University

May 2017

Atlanta, Georgia

- Bachelor of Science, Computer Science

---

## TECHNICAL SKILLS

---

### Languages

- Proficient in: Angular 4, HTML5, CSS/SASS, TypeScript, Ajax, C#, ASP.NET Core 2.0, Entity Framework, SQL, Java
- Familiar with: Code Reviews, Source Control, Build/Release

### Software

- Database: MySQL Workbench, SQL Server
- Platforms: Windows OS, Visual Studio 2016, GitHub, NetBeans, Eclipse, Team Foundation Server

---

## PROFESSIONAL ASSOCIATION MEMBERSHIPS

---

### Association for Computing Machinery

October 2013 - Present

- ACM Professional Member

### Institute of Electrical and Electronics Engineers

June 2017 - Present

- IEEE Professional Member

### Panther Hackers

2014 – 2017

Georgia State University

- Club Member

---

## EXPERIENCE

---

### Software Developer

October 2017 - Present

Valuant

- Collaborated with a multicultural team of full-stack developers and testers to build a single-page web application from the ground up using Angular 4 and 5, various JavaScript Libraries, and ASP.Net Core 2.0 with Entity Framework Core.
- Created robust, clean, and reusable code, and encouraged colleagues to do the same to reduce redundancies in the code base and improve code quality and maintainability.
- Created several widgets and reusable Angular components that are used in many places around the application, such as table paginators, search bars, validators, error log tables.
- Developed several user-friendly pages to manage company contacts, display tables containing data from historical analyses and various financial accounting models.
- Made suggestions and collaborated with the product development leaders to enhance the user experience in the app through design tweaks.

---

## RELEVANT EXPERIENCE

---

### Personal Website - <https://vthomas13.github.io/>

August 2017 - Present

- Created a resume website to practice animations, and as a sandbox to test any new technologies I learn.
- Experimented with the GitHub Pages to create an online portfolio for future projects.
- Created when I started as an intern at Valuant, but I wish to update this page in the near future to reflect more of my skills.
